

About Us

Our Mission

To be the consummate resource to our clients by providing services that are professional, timely and which employ the best and most modern technology available.

To always be cognizant of our good fortune and to share our success with others through involvement in a wide variety of charitable contributions and community service.

History

Over the past forty years, apparel marketers have recognized and rewarded our stability, experience, integrity and dedication to client service with their loyalty and valued business.

Many of the core business logistics services the entire industry now takes for granted were pioneered and perfected by DYNAMIC. We provide broad range of services which include shipping, transportation, tracking, consolidation and distribution. We also provide such apparel industry specific services as pick and pack, pressing, repair, re-ticketing, re-bagging and affixing security attachments among others.

We have always embraced new technologies and continue to be in-tune with the latest IT demand. Whether that translates into documenting and tracking physical goods, internal security systems, GPS vehicle and container tracking or fully integrating with our customers' supply chain management systems . . . we are up to the challenge.

Today's supply chain contains myriad global and local challenges. DYNAMIC has over 40 years of experience meeting those challenges. The supply chain can be a puzzle; DYNAMIC International's systems, procedures and services, provide all the pieces and seamlessly put them together for our customers. That is a statement few if any can make.

Facilities

Dynamic is proud of the infrastructure we have built over the past 40 years. To maintain our leadership position we have developed facilities to handle the unique demands of off-shore sourcing.

These include:

Los Angeles, California

- 750,000 square feet . . . handling trans-loading and direct distribution of Trans-Pacific cargo.

Miami, Florida

- 350,000 square feet . . . handling cargo from the Caribbean Basin and Central America.

New York / New Jersey Metropolitan Area

- 2,000,000 square feet

That's a total of over 3,100,000 square feet dedicated to full service apparel logistics.

We maintain a transportation fleet of over 1000 modern vehicles providing National and Regional LTL and TL service throughout the Continental United States, including strategic gateway airports, piers and rail heads. All are equipped with state-of-the-art GPS Tracking, maintenance systems and the latest EPA fuel emissions standards technology.

We are most proud of the more than 2000 people who are the heart and soul of our operations. These are people of multiple skills and a great deal of experience in this very demanding industry. From our drivers, warehouse and distribution floor staff to our supervisors, managers and senior management, Dynamic is the perfect word to describe the synergy that creates seamless service and performance for our customer base.

Far more than keeping pace, we are setting the standard!
